You can also end up at these pages by following links that you find on the web or in IM messages.. Frequently Asked Questions1 What is phishing?Phishing is a particularly popular scam in which a party creates an official-looking web page that asks you to provide your username and password, or other personal information such as your Social Security number, bank account number, PIN number, credit card number, or mother's maiden name or birthday.. Tip: Since a forged URL can look very similar to a genuine one, it's safer to use a bookmark you've created or to type the URL into the location bar by hand instead of following links from your email.. comhttp://www google comhttp://www ebay comIn some cases, URLs will be a bit more complex; be sure to check the name listed immediately to the left of the top level domain (.. com fraudulentdomain com/login html is NOT! Neither is www g00gle com (note that in this URL, the letter o is replaced by the number 0).. (If there's no slash, start at the end of the URL) This is the part of the URL that determines site ownership.. 2 How can I tell if a page is a fake?The best thing to do is to check the page's URL to make sure it's actually controlled by the party it appears to be controlled by.. Our software also examines pages' content and structure in order to catch potentially misleading pages.. Google and Android security teams collaborated to develop an app scanning infrastructure that protects Google Play and powers Verify Apps to protect users who install apps from outside Google Play. 0041d406d9 [Need For Speed Most Wanted 2012 Mac Download Free](#)
